

POWER AND PRODUCTS

- Electric power : three-phase system without neutral conductor
- Power circuit : 400 V - 50 Hz
- Control circuit : 110 V AC – 24 V CC
- Pneumatic pressure : 5-6 bar
- Hydraulic pressure : 120 bar
- Thermal power : none
- Products:

water	: none	-	flammable materials	: none
neutral gases	: none	-	acids and bases	: none
toxic agents	: none	-	hydraulic oil	: yes
reduction gears oil	: yes	-	lubrication grease	: yes
other products	: Cold rolled steel, stainless steel			

Some general information is hereby given that will prove useful in the execution of cut to length operation on the various machines making up the line. This description includes perimeter protection devices which, according to the terms of the contract, may be part of the supply or may be purchased separately by the customer as is the case with this specific supply.

It is recommended that the personnel in charge of production check that the information supplied is correct, so that the plant can be operated safely and efficiently. This set of information may therefore be used as a basis for creating operating instructions to be followed by the operator.

Such documentation, appropriately revised, amended and updated must be attached to the operator's and service manual, a copy must be delivered to the manufacturer so that the of the operator's manual original may be updated.
